

Rescon is a wonderful, caring company. Not only are they knowledgeable and professional, but they truly care about their customers. My situation was ~~is~~ not only a water problem, but a time related problem as well. At nine months pregnant, I had to leave my house due to mold from a basement flood. Rescon moved up my sump pump appointment date so the water & mold could be taken care of before my baby was born. And after his birth, Rescon sent my family a card congratulating us!
