RESCON Basement Solutions, LLC
3 Commercial Lane, Unit C
Londonderry, NH 03053

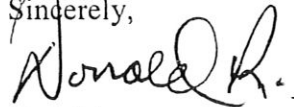

Gentlemen:

Thank you for installing your RESCON system for us in March 2005. At the time, my mother was living at 11 Rosewood Road, Methuen, MA and for all of the years she had lived in the house, there seemed to be water in the cellar on a regular basis. The sump pump was continually running during any big downpour! The house sits on ledge and any minor work that my parents had done to correct the water problem seemed to have failed...until RESCON came on the scene last year.

You installed a system which appears to have taken care of any water problem in the cellar. During the recent "Flood of 2006", which caused so much havoc to so many homes in the Methuen area, this formerly water-drenched home was BONE DRY!

My mother, who owned the home on Rosewood Road has passed away since your work was completed last March, but we had to write and let you know how happy she would have been and how pleased we are with your system.

Sincerely,

Donald

Patricia I
